

PRUTHVISH MODI

Ahmedabad, IND | +91 6353538827 | lampruthvishmodi@gmail.com

PROFILE

Software engineer specializing in scalable E-commerce, Fintech, Healthcare Platforms and Enterprise Applications. Delivered 15+ production projects across healthcare, fintech, and retail domains. Expert in headless commerce (Medusa.js, Shopify, BigCommerce), modern CMS (Sanity, Strapi, Payload), and full-stack development with React/Next.js and Node.js and many other Tech.

SKILLS

Frontend Tech:- HTML5, CSS3, JavaScript, React 19, Redux, Toolkit Next.js 15, TypeScript, Vue.js, Tailwind Material UI, Shadcn

Backend Tech:- Node.js, Express, GraphQL, REST APIs, WebSockets, Microservices

Dev Ops:- Docker, Vercel, AWS, GCP, CI/CD, Git, Jest, React Testing Library

Data-bases:- PostgreSQL, MongoDB, Supabase, Redis, MySQL, Meilisearch

Mobile Development:- React Native, Flutter

CMS:- Strapi, Sanity, Payload,

E-Commerce:- WooCommerce, Big commerce, Medusa.js, Shopify, Lovable

Search Engine:- Meilisearch, Algolia, Elastic Search

AI tools:- n8n, Agentic AI, MCP Implementation, Prompt Engineering

No-Code Platform:- Builder.io, Framer, Webflow

Payment Gateway:- MIPs, PagSeguro, RazorPay, PhonePe, Stripe

Fulfillment:- Shippo, Amazon, Shipping, Delhivery, FedEx

PROJECTS/CONTRACTUAL

AI Solution Projects

- **Haira AI | AI-Powered HR Management Platform:** Developed and enhanced an AI-driven HR management platform to automate the complete employee lifecycle, including recruitment, onboarding, employee engagement, training, and workforce management. Integrated AI-powered workflows and LLM-based features to streamline HR operations, implemented real-time communication using LiveKit, and collaborated with Python-based AI services. Contributed to computer vision capabilities using YOLOv8 and MediaPipe while building scalable and responsive frontend modules with Next.js.
Stack: Python, LLMs, NLP, Computer Vision, Deepfake Detection Models, Video Analysis Pipelines, Speech-to-Text (STT), Text-To-Speech (TTS), Resume Ranking Models, FastAPI,
- **Vendelligent :** Vendelligent is an AI-powered conversational platform that enhances mobile and web applications through intelligent AI avatars and specialized AI agents. The solution enables users to interact using voice or chat, receive personalized recommendations, discover products and services, navigate locations, and access platform features through natural conversations, creating a more engaging and human-centric digital experience.
Android: <https://play.google.com/store/apps/details?id=com.vendelligent.menwayn>
iOS: <https://apps.apple.com/sa/app/menwayn-%D9%85%D9%86-%D9%88%D9%8A%D9%86/id6759066301>
Stack: AI, React, Next.js, Node.js, React Native
- **AI Agents:** n8n, OpenRouter, FastAPI, LangGraph, LangChain, Ollama, Puppeteer, Docker, Unsloth, Hugging Face Transformers, LoRA/QLoRA, LlamaIndex, Qdrant, FAISS, YOLOv8, OpenCV, PyTorch, custom WebRTC, LLMs, STT, TTS, and WebRTC

WebSite Projects

- **RoboSoft | CAS CMS (OTT Platform):** Built and maintained scalable APIs for an OTT CMS platform using Node.js and Strapi within a monorepo architecture. Developed modular backend services to manage content workflows, metadata, and publishing operations. Improved code reusability and service maintainability through structured monorepo practices, supporting efficient OTT content management and platform scalability.
Stack: Node.js, Strapi, Monorepo, PostgreSQL, REST API

Multilingual Automation: Built a custom Strapi plugin enabling content translation into 200+ languages from the admin panel. Developed a React-based UI for bulk translation, locale management, and real-time status tracking. Integrated translation APIs with scalable background processing and multi-locale publishing support.
Stack: React, Node.js, Sanity CMS, PostgreSQL
- **Inhouse.Furniture | Future. Works ERP for Architects:** Built full-stack eco-friendly packaging platform with product customization engine (2D design, real-time preview). Implemented bulk ordering, custom branding tools, and seamless checkout for B2B/B2C segments.
Stack: React.js, Next.js, Typescript, Sanity CMS, TailwindCSS, Hygraph
- **Yogateria | A well-being E-commerce :** Collaborated on building an intuitive and responsive user interface & contributed to the development and delivery of a robust and scalable e-commerce. **Stack:** React, Next.js, Sanity, Medusa.js, PostgreSQL, Redis, Tailwind CSS, shadcn/ui,
- **Skillmatics | Educational Products E-commerce Platform:** Developed a high-performance, scalable e-commerce platform for educational products with a strong focus on user experience, conversion optimization, and SEO. Implemented responsive UI, optimized page load speed, and enhanced product discovery with efficient filtering and navigation. Integrated secure payment gateways and third-party services while ensuring smooth checkout flow and mobile responsiveness.
Stack: Next.js, React.js, Shopify, Tailwind CSS, Razorpay/Stripe, REST APIs
- **Strainex | Clean-Tech & Smart Grid Solutions:** Developed headless commerce platform for energy-efficient equipment, telecom infrastructure, and solar products serving Dubai, India, and USA markets.
Stack: React 19, Next.js 15, Medusa.js, Sanity CMS, Supabase, PostgreSQL, Redis, Meilisearch
- **Wraprr | Sustainable Packaging E-commerce:** Built full-stack eco-friendly packaging platform with product customization engine (2D design, real-time preview). Implemented bulk ordering, custom branding tools, and seamless checkout for B2B/B2C segments.
Stack: React 19, Next.js 15, Medusa.js, Payload CMS, Supabase, PostgreSQL, Redis, Meilisearch, FabricJS, vercel Deployment
- **Medic Alert UK | Healthcare Membership Platform:** Contributed to the development of the MedicAlert UK platform enabling users to manage medical profiles and emergency health information. Built responsive pages and optimized performance for a seamless user experience.
Stack: PHP, MySQL, AWS, jQuery, PWA, Google Tag Manager, Facebook Pixel, Hotjar
- **Bharat Rojgaar | Employment & Job Portal:** Developed a nationwide employment platform connecting job seekers and employers. Built dynamic multi-role registration and job posting workflows. Implemented advanced job search and filtering features. Integrated REST APIs and optimized UI performance for scalability.
Stack: Next.js, React, TypeScript, Tailwind CSS, Node.js, Medusa.js, Payload CMS, Supabase, REST APIs, vercel
- **RamSoft - Blume | Healthcare Imaging Platform:** Developed and maintained the Medical Record Management module for a healthcare imaging patient engagement platform. Developed a React-based UI for bulk translation, locale management, and real-time status tracking. Built responsive and reusable UI components using React.js and managed application state with Redux. Integrated GraphQL APIs and implemented form validation with React Hook Form. Contributed to testing with Jest / React Testing Library and containerized development using Docker.

- **Mass Media Application | Content Management Platform:** Led team to fix UI bugs, implement responsive components, and manage CMS architecture for enhanced user experience
Stack: React.js, React Native, Redux Toolkit, Kentico CMS, Material UI

Synechron | [55/Redefined](#): A pioneering platform dedicated to empowering individuals over 50, offering tailored career opportunities, lifestyle content, and enterprise solutions to engage this vibrant demographic.

Stack: React, Next.js, React.js, Typescript, TailwindCSS, Node.js, Strapi.

Mobile Apps Projects

- **[FoodBoss](#) | Web & Mobile Application:** FoodBoss is an online marketplace that allows users to order groceries, food, and daily essentials from nearby supermarkets, restaurants, and local stores. The platform provides a seamless shopping experience with features like product browsing, order management, multiple payment options, and doorstep delivery, helping local vendors reach customers through a single digital platform.
Android: <https://apps.apple.com/in/app/foodboss-grocery-ka-boss/id1640038993>
iOS: <https://apps.apple.com/in/app/foodboss-grocery-ka-boss/id1640038993>
Mobile Stack: Flutter, Node.js, Express.js, PostgreSQL/MongoDB, Jest/Enzyme/React Testing Library
Web Stack: HTML5, Tailwind CSS, JavaScript, React.js, Next.js, Strapi.js, Node.js
- **[IDFC First Bank](#) | Mobile Banking Application (FD & RD Modules):** Contributed as a Consultant in building a scalable cross-platform mobile application enabling users to manage investments, open/close FD & RD accounts, and access core banking services seamlessly. Developed reusable components, optimized app performance, and ensured high-quality code using testing frameworks while collaborating with cross-functional teams to deliver secure and user-friendly features
Stack: React Native, Context API, React Testing Library
Android: https://play.google.com/store/apps/details?id=com.idfcfirstbank.optimus&hl=en_IN
iOS: <https://apps.apple.com/kg/app/idfc-first-bank-mobilebanking/id1521443352>
- **[Jupiter Money](#) | Rewards System (Neo Banking App):** Spearheaded the design and development of the rewards system for a high-scale Neo banking mobile application, enhancing user engagement through seamless reward tracking and redemption flows. Architected robust state management using Context API and XState to handle complex business logic and asynchronous flows. Collaborated cross-functionally to deliver preferment, user-centric features with real-time notifications and smart spend categorization. Drove code quality through structured testing using React Testing Library.
Stack: React Native, Context API, XState, React Testing Library, Flutter
Android: https://play.google.com/store/apps/details?id=money.jupiter&hl=en_IN
iOS: <https://apps.apple.com/in/app/jupiter-cards-upi-banking/id1507748747>
- **[The Chosen TV](#) | (OTT Platform):** The Chosen TV is a video streaming platform that allows users to watch episodes of The Chosen, a historical drama series based on the life of Jesus Christ. The platform provides on-demand video streaming, exclusive content, behind-the-scenes videos, community resources, and multi-device viewing experiences through web, mobile, and smart TV applications
Stack: React, Node.js, Payload CMS, Next.js, PostgreSQL
Android: https://play.google.com/store/apps/details?id=net.comeandsee.thechosen&hl=en_IN
iOS: <https://apps.apple.com/us/app/the-chosen/id6443956656>

EXPERIENCE

Publicis Sapient

Lead Experience Engineer

- **Deutsche Bank - Credit Risk Management (Portfolio Monitoring System):** Developed and enhanced the rule engine module for credit risk evaluation, enabling dynamic configuration and execution of risk rules across financial portfolios. Implemented Key Risk Indicators (KRIs) for real-time monitoring, threshold-based alerting, and proactive risk mitigation. Ensured seamless integration with the existing portfolio monitoring system while improving performance and maintainability of critical workflows.
Stack: React.js (Vite), Context API, Material UI

- **Natwest Commercial - Client relation management:** Built comprehensive dashboard for relationship managers to track business client interactions, engagement strategies, and historical data for improved decision-making.
Stack: React.js, Redux Toolkit, Jest
- **OptumRx Meteor: Architected healthcare prescription platform:** reduced load times 40%, achieved 85% test coverage. Mentored 5 engineers on TypeScript best practices and modern development workflows
Stack: React 19, Next.js 15, Node.js, PostgreSQL
- **Enrich-Plus Employee Management System:** Migrated legacy Next.js app to latest version using micro-frontend architecture and Module Federation for scalable, maintainable codebase
Stack: Next.js 15, GraphQL, Material UI, Module Federation

Yunay LLC

Senior Software Engineer

- **BuildWise & Designer ERP:** Custom project management systems (Next.js, Strapi, PostgreSQL) - cut planning time 70%
Developed contact modules with TypeScript and Tailwind for lifestyle platform

Solas Marine LLC

Senior Software Engineer

- **Solas Tank Monitoring:** Real-time marine IoT system (Node.js, WebSockets, MySQL) — 10K readings/min, 99.9% uptime

NEPRA Technologies

Software Engineer

- **ESG Konnect:** Sustainability consulting tool (React.js, Chart.js, MySQL) with interactive dashboards for ESG tracking

EDUCATION

Sunrise University

- **B.Tech,** Electrical Engineering, [2016](#)

Swami Sacchidanand Polytechnic Collage

- **Diploma,** Electrical Engineering, [2012](#)
